

Molecular Cell Biology Seminar Series
Wednesdays Smith Lecture Theatre

1st October 1-2pm

Matthias Sedorf (ZMBH, Heidelberg)

'Unconventional Sorting of Membrane Proteins'

8th October **NO SEMINAR**

15th October **12-1pm**

Craig McKibbin (FLS, Manchester)

'Small molecule inhibitors as tools to study events at the endoplasmic reticulum'

22nd October 1-2pm

Pete Cullen (Department of Biochemistry, University of Bristol)

'Functional architecture of sorting endosomes'

29th October **12-1pm**

Matthew Chu (FLS, Manchester)

'Crystal structure of the human spindle-assembly checkpoint kinase Mps1 catalytic domain'

Tom Mroweic (FLS, Manchester)

'Making the way out - 14-3-3 proteins in multimeric membrane protein transport'

5th November 1-2pm

Nikolai Braun (FLS, Manchester)

'physiology of the yeast secretory system'

12th November 1-2pm

Clare Futter (Institute of Ophthalmology, London)

'Multivesicular bodies: biogenesis, interactions and functions'

19th November 1-2pm

Jeanine De Keyser (FLS, Manchester)

'Disruption of the nucleotide binding pocket of Lhs1p abolishes function in vitro and in vivo'

26th November 1-2pm

Neftali Flores-Rodriguez (FLS, Manchester)

'Novel method to accurately track endosomes labelled with low levels of GFP-Rab5'

3rd December **NO SEMINAR**

10th December 1-2pm

Cheryl Woolhead (Dept Biochemistry & Cell Biology, University of Glasgow)

'Communication Mechanisms between Nascent Polypeptides and the Ribosome'

Sponsored by Formedium, Newbank Scientific

For further information, contact Lisa Swanton (51554) or Martin Lowe (55387)
