

NEUROSCIENCE RESEARCH
Seminar Series

Unless stated otherwise,
seminars are at 4:00 pm
in A.V. Hill seminar room

First Semester 2008/9

Nov 5 th Michael Smith Seminar Room (4-5pm) N Rothwell/ E Pinteaux	Jan Lundberg, Head of Global Research at AstraZeneca Samantha Budd, Director, Neurology Disease Area Leader at AstraZeneca	AstraZeneca Drug Discovery Advances in Research and Drug discovery in Alzheimer's disease
Nov 12 th R Baines	Alex Whitworth Sheffield	Genetic analysis of Parkinson's disease in Drosophila
Nov 26 th	Adam Denes Manchester	Inflammatory cells in the brain: invited "speakers" and cheeky intruders
Dec 3 rd R Petersen	Gerald Finnerty London	What does experience-dependent plasticity tell us about learning and memory
Dec 10 th S Allan/E Pinteaux	Marina Lynch Dublin	Modulation of microglial activation and the consequences for neuronal function
Dec 17 th	Natalie Gardiner Manchester	AGE formation in the extracellular matrix: contribution to sensory nerve regeneration in diabetic neuropathy
Jan 14 th	TBC	
Jan 21 st	Ruth Itzhaki Manchester	Herpes simplex virus type 1 in brain: a cause of the neuropathological features of Alzheimer's disease?
Jan 28 th R Baines	David Sattelle Oxford	C. elegans models of CNS and neuromuscular disorders
