

Computational and Evolutionary Biology Seminar Series, Autumn 2009-2010

For further information about this programme of events contact,

- Daniel Rozen/ Jean Marc Schwartz

Monday, 12 October 2009

- A decade of evo-devo studies on the segmentation of a strange model arthropod: questions, answers, and more questions
Dr. Wallace Arthur, National University of Ireland, Galway

Monday, 19 October 2009

- Expanding the PLUNC family - a novel family in vertebrate innate defence molecules?
Colin Bingle, University of Sheffield

Monday, 26 October 2009

- Causes and consequences of phenotypic plasticity
Stew Plaistow, University of Liverpool

Monday, 02 November 2009

- Post-translational regulation has a major impact on the fate of duplicated genes
Grigoris Amoutzias, University of Ghent

Monday, 09 November 2009

- Sex, drugs and molecular biology: natural selection in insects
Richard French-Constant, University of Exeter

Monday, 16 November 2009

- Palaeobiology and evolution of the stegosaurian dinosaurs: recent advances and future directions
Susannah Maidment, Natural History Museum

Monday, 23 November 2009

- The War Between Tooth and Food: Integrating experimental and theoretical analyses to understand dental morphology
Phillip Anderson, University of Bristol

Monday, 30 November 2009

- Evolution of clonally transmissible cancer in dogs and Tasmanian devils
Elizabeth Murchison, Wellcome Trust Sanger Institute

Monday, 07 December 2009

- TBA
Eladio Bario, Universitat de València

Monday, 14 December 2009

- Maternal effects on Life-history traits in Humans
Ian Rickard, University of Sheffield
