

Cellular Systems Seminar Series
Wednesday 12pm, Smith Lecture Theatre

30th Sept

Axel Behrens (CRUK London Research Institute, Lincoln's Inn Fields)
'*JNK signalling in stem cells and cancer*'

7th Oct

Peter Friedl (Nijmegen Centre for Molecular Life Sciences, The Netherlands)
'*Physical limits of invasive cell migration in 3D tissues*'

14th Oct

Colin Robinson (Department of Biological Sciences, University of Warwick)
'*Protein transport by the Tat pathway: quality control at all costs*'

21st Oct **NO SEMINAR**

28th Oct

Thomas Mayer (Department of Biology, University of Konstanz)
'*Mitosis and Meiosis: The challenge to equally distribute the genome*'

4th Nov **NO SEMINAR**

11th Nov

Mike Blatt (Plant Sciences Group, University of Glasgow)
'*A new perspective on traffic, transport and cellular growth*'

18th Nov

Mark Marsh (MRC Laboratory for Molecular Cell Biology, University College London)
'*HIV assembly - the macrophage scenario*'

25th Nov

Chris Smith (Department of Biochemistry, University of Cambridge)
'*Understanding the codes and mechanisms of alternative pre-mRNA splicing*'

2nd Dec

Robert Weinzierl (Division of Biology, Imperial College London)
'*High-throughput Functional Dissection of the Active Site of RNA Polymerase*'

Sponsored by: Melford, Roche
