

Seminars are at 4:00 pm
A.V. Hill (seminar room 1.006), unless stated otherwise

First Semester 2009/10

October 7 th D Brough	Claudia Eder, London (UK)	Physiological mechanisms of lysophosphatidylcholine-induced activation of microglia
October 14 th 3 rd year PhD talks (AV Hill, 4.005)	Christopher Kobylecki Sara Namvar	Glutamatergic mechanisms in motor complications of Parkinson's disease Feeding entrainable oscillators: A novel approach towards understanding obesity and diabetes
October 21 st 3 rd year PhD talks (AV Hill, 4.005)	Indrayani Ghangreka	Determining the role of the core clock transcription factor vrille during photoreceptor development in Drosophila
October 28 th 3 rd year PhD talks	Lauren Summers	Regulation of interleukin-1 by the extracellular matrix in the brain
November 11 th R Lucas	Gebhard Schertler Cambridge (UK)	Structure of G protein coupled receptors: Implications for signalling and pharmacology
November 18 th J Gigg	Menno Witter Trondheim (Norway)	Functional architecture of the parahippocampal-hippocampal system: A structural view on memory
November 25 th R Petersen	Angus Silver London (UK)	Desynchronization of an electrically coupled interneuron network with sparse excitatory synaptic input
December 2 nd 3 rd year PhD talks	Loan Nguyen	Role of interleukin-1 receptors in brain cells signalling
January 28 th N Rothwell/ E Pinteaux	Ron Tjalkens Colorado (USA)	TBA
