

**Cellular Systems Seminar Series**

**Wednesday 12pm, Smith Lecture Theatre**

27<sup>th</sup> Oct

**Cyril Zipfel** (The Sainsbury Laboratory, Norwich)

*'Receptor kinase signalling in plant innate immunity'*

3<sup>rd</sup> Nov

**Margaret Ashcroft** (University College London)

*'Novel regulation of hypoxia inducible factors and oxygen sensing in cancer'*

10<sup>th</sup> Nov

**Neil Perkins** (Institute for Cell and Molecular Biosciences, Newcastle University)

*'Regulation of cancer cell proliferation and survival by NF-kappaB '*

17<sup>th</sup> Nov

**Slavador Aznar-Benitah** (Centre for Genomic Regulation, Barcelona)

*'Epidermal stem cell heterogeneity and molecular clocks: impact on homeostasis, aging and cancer'*

24<sup>th</sup> Nov

**Elizabeth Veal** (Institute for Cell and Molecular Biosciences, Newcastle University)

*'Responding to stress; multiple roles for peroxiredoxin antioxidants'*

1<sup>st</sup> Dec

**Paul Luzio** (Cambridge Institute for Medical Research, University of Cambridge)

*'The delivery of endocytosed cargo to lysosomes'*

8<sup>th</sup> Dec

**Cheryl Woolhead** (University of Glasgow)

*'Communication Mechanisms between Nascent Polypeptides and the Ribosomes'*

Sponsored by: **Melford, Cambridge Research Biochemicals, Formedium**
