

Special Seminars Autumn 2010-2011

Wednesday, 22 September 2010

- Regulation of Rac GTPase by RhoGDI and membrane microdomains
Dr Konstadinos Moissoglou, University of Virginia

Monday, 04 October 2010

- A web-based method for improving dementia care
Professor Ken Rockwood, Dalhousie University
- Manchester Centre for Biophysics and Catalysis Launch Event

Thursday, 14 October 2010

- Dehydrated but unharmed? Protein Complexes in the Gas Phase
Prof. Carol Robinson, Department of Chemistry, University of Oxford

Tuesday, 19 October 2010

- Normal breast development. Insights into cancer progression
Professor Barry Gusterson, University of Glasgow; College of Medicine, Veterinary and Life Sciences, Institute for Cancer Sciences

Friday, 22 October 2010

- Cathepsin B has Caspase-3 like activity and regulates PCD in Arabidopsis Thaliana
Yuan Ge, The University of Manchester

Tuesday, 09 November 2010

- Get Your Clone in 3 days: A Molecular Cloning Troubleshooting Guide
Dr Calin Andras, Thermo Fisher Scientific/Fermentas product line

Monday, 15 November 2010

- Use of human induced pluripotent stem cells (iPSC) to model a human premature aging disease
Alan Colman, A*STAR Institute of Medical Biology, Singapore

Thursday, 18 November 2010

- Encoding of the cough reflex.
Brendan Canning, Johns Hopkins, Baltimore

Tuesday, 23 November 2010

- Of Mice and Men: Mechanical Signaling and Scar Formation Across Species
Professor Geoffrey C. Gurtner, MD, FACS, Materials Science and Engineering Stanford University School of Medicine

Monday, 29 November 2010

- Mammary epithelial stem and progenitor cells: understanding the cellular context of breast tumours
Dr John Stingl, CRUK Cambridge Research Institute
