

Special Seminars

July 2011 – December 2011

Thursday 07 July 2011

- A paradigm shift in the brain-immune relationships: Circulating immune cells are needed for CnS plasticity, neuroprotection and neurogenesis
Michal Schwartz

Monday 11 July 2011

- Evolving ideas on GPCR expression and compartmentation
Paul Insel

Wednesday 13 July 2011

- Molecular Environmental Biology Network Meeting
Various

Tuesday 19 July 2011

- Graphene: Materials in the Flatland
Professor Kostya Novoselov

Monday 26 September 2011

- The role of the basement membrane in the stem cell niche
Hiro Fujiwara

Tuesday 27 September 2011

- Cell-Matrix Centre PhD Symposium
Various

Tuesday 04 October 2011

- Developmental Biology PhD Student Symposium
Various

Wednesday 05 October 2011

- PI(4,5)P2 networks controlling cell morphogenesis during mitosis
Dr Sebastien Carreno

Wednesday 09 November 2011

- Evolution of deep trophoblast invasion in primates
Prof Anthony Carter
- The biology of tissues and basement membranes in Drosophila
Jose Pastor-Pareja

Tuesday 15 November 2011

- How short a shelf-life for functional noncoding sequence?
Chris Ponting

Monday 21 November 2011

- Metals, Metalloproteins and Metalloproteomics: Copper homeostasis from Synechocystis to Staphylococcus
Dr Kevin Waldron

Wednesday 23 November 2011

- Cortical oscillations in vitro: new directions and vistas
Dr Mark Cunningham

Monday 28 November 2011

- A regulatory switch controlling Type III and Type VI secretion systems in Pseudomonas aeruginosa
Professor Alain Filloux
- Can Submolecular Resolution be Achieved by Raman Spectroscopy?
Prof. Volker Deckert
