

Tissue Systems Internal Seminars - Autumn 2011-2012

Tuesday 18 October 2011

- Analysing tumour cell invasion in vivo/ Insertional mutagenesis using a Tol2 gene trap transposon in *Xenopus tropicalis*
Anna Chapman/ Shoko Ishibashi

Tuesday 25 October 2011

- miR-9 regulates axon development in cortical neurons/ The (+)TIP of the integrin iceberg
Federico Dajas-Bailador/ Janet Askari

Tuesday 01 November 2011

- Cell-cell cross talk regulates mucin production by airway cells in vitro/ The role of estrogen receptor signalling in delayed wound healing
Ceri Harrop/ Elaine Emmerson

Tuesday 08 November 2011

- Using microbes to identify the molecular mechanisms underlying complex social behaviour/ TBA
Jennifer Howie/ Pengbo Wang

Tuesday 15 November 2011

- TBA/ Analysis of p63 transcriptional targets in the secondary palate
Katarzyna Pirog/ Karen Mitchell

Tuesday 22 November 2011

- Cartilage tissue engineering using pluripotent stem cells/ Investigation of the role of TSG-6 in formation and maintenance of cartilage and osteoarthritis
Alex Cheng / Sheona Drummond

Tuesday 29 November 2011

- Focal adhesion kinase transforms mammary epithelial cells/ Tracking myeloid cells in *Xenopus*
Fiona Foster/ Roberto Paredes

Tuesday 06 December 2011

- Su(dx) confers robustness to Notch signalling in the flies/ Insights into liver fibrosis from ECM proteomics
Marian Wilkin/ Jon Humphries
