

Tissue Systems Seminar Series 2011/2012

Thursdays, 12:00, Michael Smith Lecture Theatre

Thursday 29 September 2011

Roberto Mayor – University College London

Migration of neural crest cells: a balance between repulsion and attraction

Thursday 6 October 2011

Clair Baldock – University of Manchester

Nanostructure and elastic properties of human tropoelastin

Thursday 13 October 2011

Karel Dorey – University of Manchester

Regulation of axonal morphology during development

Thursday 10 November 2011

Maria Dolores Martin Bermudo – University of Cambridge

Mechanisms regulating collective cell migration

Thursday 17 November 2011

Nic Tapon – Cancer Research UK

Control of tissue growth by the Hippo signalling pathway in *Drosophila*

Thursday 24 November 2011

Charles Streuli – University of Manchester

New facets of integrin signalling in epithelial biology

Thursday 1 December 2011

Shane Herbert – University of Manchester

Transcriptional control of endothelial tip cell behaviour and new blood vessel sprouting

Thursday 8 December 2011

Jenny Gallop – University of Cambridge

Understanding cell shape: reconstitutions of actin polymerisation at the membrane-cytosol interface
