

Tissue Systems Seminar Series

Winter 2011-2012

Thursday 12 January 2012

- Regulation of mesenchymal stem cell fate
Cay Kielty

Thursday 19 January 2012

- New facets of integrin signalling in epithelial biology
Charles Streuli

Thursday 26 January 2012

- TBC
Karl Tryggvason

Thursday 02 February 2012

- Temporal control of signalling centres in regulation of forebrain size and complexity
Corinne Houart

Thursday 23 February 2012

- Food for thought: nutrients and neural stem cells
Alex Gould

Thursday 01 March 2012

- Regulating human pluripotent stem cell maintenance or differentiation with help from the ECM
Sue Kimber

Thursday 08 March 2012

- Pushing cells and pathogens with actin
Vic Small

Thursday 15 March 2012

- Stem cell-niche interactions in mammalian epidermis
Fiona Watt

Thursday 22 March 2012

- Centrosome and asymmetric stem cell divisions: size does matter
Jordan Raff

Thursday 29 March 2012

- Periodic patterning during skin development
Denis Headon
