

FACULTY OF LIFE SCIENCES
CELLS TO TISSUES SECTION

MICROBIOLOGY RESEARCH
SEMINAR SERIES - SPRING 2008

All Seminars are on Tuesdays, 12.00 or 1.00pm
In Smith Lecture Theatre, Michael Smith Building

Date	Name	Institution	Title
8 April 1 pm	Dr Nicola Stanley-Wall	College of Life Sciences, University of Dundee	A complex problem - Controlling biofilm formation by <i>Bacillus subtilis</i>
22 April 12 noon	Professor Mumtaz Virji	Dept of Cellular & Molecular Biology, University of Bristol	Host targeting mechanisms of <i>Neisseria meningitidis</i> - What matters in epithelial barrier penetration?
29 April 1 pm	Dr Gary Bending	Warwick HRI, University of Warwick	Diversity and biogeography of mycorrhizal fungi
6 May 12 noon	Professor Bernard Priem (sponsored by SGM)	Centre de Recherches sur les Macromolécules Végétales, CNRS, Grenoble	Glycoengineering in <i>E. coli</i> for the synthesis of recombinant oligosaccharides
20 May 12 noon	Professor Jay Hinton	Institute of Food Research, Norwich	tba
27 May 12 noon	Dr Christian Heintzen	Faculty of Life Sciences, University of Manchester	Biological timing in <i>Neurospora crassa</i> - The role of VVD in circadian control of spore development

For further information on any of the above, please contact Dr. Michael Kertesz (Tel. 0161 275 3895)
