

Faculty of Life Sciences
AstraZeneca 2009 Seminar Series
Wednesday 12 noon

January 21 - Smith LT

Ed Louis (Nottingham)

Lessons from Population Genomics of Yeasts

January 28 - Smith LT

Pierluigi Nicotera (Leicester)

Synaptic Dysfunction in Neurodegeneration

February 4 - Stopford LT1

Gillian Griffiths (Cambridge)

Cell Polarity in the Immune System

February 11 – Stopford LT1

Jean Pieters (Basel)

Mycobacterium tuberculosis, Macrophages and T cells: Competing to survive

February 18 - Stopford LT1

Paul Taghert (St Louis)

Coordination of circadian pacemaking centers by neuropeptide signaling in Drosophila

February 25 - Stopford LT1

Christiane Nüsslein-Volhard (Tubingen) Nobel Laureate in Medicine 1995

On flies and fishes and the origin of vertebrates

March 4 - Stopford LT1

Paul Smith (AstraZeneca, UK)

Understanding sensitivity and combating resistance to MEK inhibition.

March 11 - Stopford LT1

Dennis Kasper (Harvard)

The intestinal microbial flora in health and disease

March 18 - Stopford LT1

Mark Ferguson (Manchester)

Scar Wars – from discovery of embryonic scar free healing to potential human pharmaceuticals.

March 25 - Stopford LT1

Mike Stratton (Wellcome Trust Sanger Centre)

Patterns of somatic mutation in human cancer genomes
