

Bioinformatics and Functional Genomics Seminars, Spring 2008-2009

For further information about this programme of events contact,

- Jean-Marc Schwartz, Email: jean-marc.schwartz@manchester.ac.uk, Tel: +44 (0)161 306 2588

Monday, 23 February 2009

- Domestication, genetics, evolution, and civilization
Greger Larson, Durham University

Monday, 02 March 2009

- Deciphering developmental disorders
Nigel Carter, Sanger Institute

Monday, 16 March 2009

- Defrosting the Digital Library: Bibliographic tools for the next generation web
Duncan Hull, University of Manchester

Monday, 23 March 2009

- Dissecting cis vs. trans effects on gene expression variation
Stephen Montgomery, Sanger Institute

Monday, 30 March 2009

- Fast forward genetics using next-generation sequencing
Neil Hall, University of Liverpool

Monday, 20 April 2009

- Calcium signaling in plants: chaotic communication?
Richard Morris, John Innes Centre

Monday, 27 April 2009

- The cost of mating - a genomic survey of expression in female fruit flies
Dave Gerrard, University of Manchester

Monday, 11 May 2009

- Interfering with vitamin B6 metabolism in the human malaria parasite
Plasmodium falciparum
Ingrid Müller, Bernhard Nocht Institute for Tropical Medicine

Monday, 18 May 2009

- What can we say about the origin of the eukaryotic cell?
James McInerney, National University of Ireland

Tuesday, 26 May 2009

- ChEMBL - Open Access Data for Drug Discovery
John Overington, European Bioinformatics Institute
