

MCS Seminar Series 2009
Thursdays 1-2pm Smith seminar room

- May the 27th **Anne Donaldson** (University of Aberdeen) (Wed, 2-3pm Smith)
“Replication and Organisation of Yeast Chromosomes”
Host: Catherine Millar
- June the 4th **Sonya Hartmuth** (Petersen lab)
“Environmental control of cell size”
Nicola Beresford (Tabernero lab)
“Phosphatase inhibitors: applications to disease”
- June the 11th **Ling-I Su** (Shore lab)
“Regulation of gene expression by interferon regulatory factor 6”
Mark Gurden (Taylor lab)
“Degradation of the kinetochore protein Cenp-F: mechanism and function”
- June the 25th **Elisa Aguilar-Martinez** (Sharrocks lab)
“Molecular functions and the regulation of protein SUMOylation”
Richard Monaghan (Whitmarsh lab)
“A novel nuclear role for the mitochondrial hydroxylase Clk-1 and its regulation under stress conditions”
- July the 2nd **Duncan Odom** (CRUK Institute in Cambridge)
“Species-specific transcription in mice carrying human chromosome 21”
Host: Andrew Sharrocks
- July the 23rd **Juan Mata** (University of Cambridge)
“Genome-wide RNA-protein networks and posttranscriptional control”
Host: Gino Poulin
