## NEUROSCIENCE RESEARCH Seminar Series

Seminars are at 4:00 pm  
in A.V. Hill seminar room (1.006)

Second Semester 2008/9

February 11 <sup>th</sup> E Pinteaux	John Atack, Beerse (Belgium)	H3 antagonists for cognition: From genome to the clinic
February 25 <sup>th</sup> A Loudon	David Hazlerigg Aberdeen	Shining a new light on Thyrotropin signalling
March 11 <sup>th</sup> E Pinteaux	Olov Nilsson Manchester	Cannabinoids as neuroprotective agents
March 25 <sup>th</sup> M Canal	Juan Madrid Murcia (Spain)	When clocks go bad: Health consequences of chronodisruption
April 8 <sup>th</sup> J Miyan	Pedro Gascon Barcelona (Spain)	The role of the tachykinin substance P in breast cancer
April 15 <sup>th</sup> E Pinteaux	Nicola Woodroffe Sheffield	Chemokines and metalloproteinases in multiple sclerosis
April 29 <sup>th</sup> 3 <sup>rd</sup> year PhD talks	Katie Chapman  Michael Bale	Systemic inflammation in experimental stroke  Transformation in the neural code for tactile stimuli from sensory receptors to cerebral cortex
May 6 <sup>th</sup> 3 <sup>rd</sup> year PhD talks	Rachel Clapp  Heather Brook	Histaminergic regulation of appetite through H1R and H3R in the ventromedial hypothalamic nucleus  Matrix metalloproteinase-2: Altered expression in diabetic rat sciatic nerve may contribute to the pathogenesis of diabetic neuropathy
May 13 <sup>th</sup> 3 <sup>rd</sup> year PhD talks	Harsimrren Kaur  Elizabeth Pawson	The role of interleukin-1 in febrile seizures and the subsequent onset of temporal lobe epilepsy  VEGF in experimental diabetic neuropathy: Neurotrophic, neuroprotective or angiogenic?
