

Faculty of Life Sciences
AstraZeneca 2010 Seminar Series
Wednesday 12 noon

January 20 - Smith LT

Gillian Griffiths (Cambridge)

Polarised secretion from lymphocytes

January 25, **Monday** - Smith LT

Tony Hyman (Dresden)

Phase transitions in cytoplasm

February 3 - Stopford LT6

Fran Balkwill (London)

Targeting Cancer-related Inflammation

February 10– Stopford LT6

Angus Lamond (Dundee)

New Approaches to Studying the Cell Nucleus: 2nd Generation Proteomics and Super Experiments

February 17 - Stopford LT6

Dirk Gorlich (Heidelberg)

The permeability barrier of nuclear pore complexes

February 24 - Stopford LT1

Gail Martin (UCSF)

FGF signaling in vertebrate development: the importance of getting it right

March 3 - Stopford LT6

Alan Ashworth (London)

Synthetic Lethal Therapeutic Approaches to Cancer

March 10 - Stopford LT6

David Berson (Brown)

Strange vision: the peculiar biology of ganglion-cell photoreceptors

March 17 - Stopford LT6

Andrea Brand (Cambridge)

Balancing self-renewal and differentiation: regulation of symmetric and asymmetric division in the Drosophila nervous system

March 24 - Stopford LT6

Tony Kouzarides (Cambridge)

Chromatin Modifying Enzymes: their function and role in cancer
