

Microbiology Seminar Series

Spring 2010

**All seminars will take place at 1pm in the Michael Smith lecture theatre
Unless otherwise stated**

15th February

Martin Wickham: Institute for Food Research, Norwich
'Modelling human digestion - a real gutsy venture'

22nd February

Sadia Saeed: 1st year PhD student, Manchester Interdisciplinary Biocentre.
'Understanding the molecular mechanism of segrosome assembly in plasmid TP228'

1st March

Tim Mitchell: Faculty of Biomedical and Life Sciences, University of Glasgow
'Streptococcus pneumoniae: virulence and variation'

8th March

Mark Stevens: Institute for Animal Health, Compton Laboratory.
'Salmonella pathogenesis in food-producing animals'

n.b. 1pm 1.006 AV Hill Building

15th March

Ann Moir: University of Sheffield
'TBA'

22nd March

Chris Tang: Centre for Molecular Microbiology and Infection, Imperial College, London.
'TBA'
