

Molecular Cancer Studies Seminars 04-07 2010

Time and venue: Thursdays, Michael Smith Seminar Room 1:30-3

All welcome; contact: m.k.demonacos@manchester.ac.uk

- 15th April **Claire Aspinall** (Taylor)
"How do cancer cells respond to anti-mitotic drugs?"
Amanda Kelly (Hurlstone)
"RNAi in zebrafish"
- 29th April **Marella De Bruijn (Oxford)**
"The birth of hematopoietic stem cells: insights emerging from studies into the transcription and role of Runx1" (Host: Paul Shore)
- 13th May **Baoqiang Guo** (Sharrocks)
"Regulation of the ETS-domain transcription factor PEA3 by acetylation"
Antony Adamson (Jackson)
"Recombinant Bacterial Artificial Chromosomes; New approaches to study NF-kB gene expression dynamics"
- 20th May **Richard Marais** (ICR)
"BRAF and RAS signalling in melanoma: biology and therapies"
(Host: Claudia Wellbrock)
- 27th May **Ling Su** (Shore)
"The Regulation of the Transcription Factor IRF6- A Key Determinant of Palate development"
Alexander Shaw (Jackson)
"Developing models to describe the mammalian replication programme"
- 10th June **Cesar Camacho** (Shore)
"Transcriptional regulation by the cytoskeletal protein filamin A"
Ilhem Berou (Demonacos)
"Resistance and sensitivity to glucocorticoid-induced apoptosis in leukemia; the role of reactive oxygen species"
- 24th June **Petra Hajkova** (Imperial College)
"Epigenetic reprogramming in mouse germ line: the repair connection" ; (Host: Gino Poulin)
- 8th July **Jason S. Carroll** (CRUK, Cambridge)
"Understanding Estrogen Receptor transcription in breast cancer"
Host: (Andy Sharrocks)
