

Faculty of Life Sciences

NEUROSCIENCE RESEARCH Seminar Series

Seminars are at 4:00 pm
A.V. Hill (seminar room 1.006), unless stated otherwise

Second Semester 2009/10

February 3 rd	Sandrine Dupre <i>University of Manchester (UK)</i>	Photoperiodism in mammals: What are the long day signals?
February 10 th <i>M Canal</i>	Andries Kalsbeek <i>University of Amsterdam (The Netherlands)</i>	Hypothalamic control of hepatic glucose production. A story about hormones, rhythms and the autonomic nervous system
February 23 rd (12 - 1 pm) <i>E Pinteaux</i>	Ron Tjalkens <i>Colorado State University, Fort Collins (USA)</i>	Neuroinflammation and nitrosative stress as therapeutic targets in Parkinson's disease
March 10 th (Michael Smith Lecture theatre) <i>R Itzhaki</i>	Louise Cosby <i>Queen's University, Belfast (Ireland)</i>	Morbilliviruses: Hitching a ride into the CNS on the back of the immune response
March 18 th (12 - 1 pm) <i>A Verkhratsky</i>	Vladimir Parpura <i>University of Alabama, Birmingham (USA)</i>	Tripartite synapse-astrocytic regulation of glutamate
May 5 th <i>3rd year PhD talks</i>	Elysse Knight Garron Dodd	Energy balance and Alzheimer's disease The action of cannabinoids to induce appetite
May 12 th <i>3rd year PhD talks</i>	Richard Smith Robin Ince	Modulation of the excitability of projection neurons within the striatum Information theoretic analysis of neural data
May 27 th <i>R Petersen</i>	Alex Thomson <i>University of London (UK)</i>	Selectivity and specificity in cortical micro-circuitry
June 2 nd <i>J Miyan</i>	Andrew Copp <i>University College London (UK)</i>	Neural tube defects: Genetics, development and prevention
