

Neuroscience Research Seminar Series - Spring 2011-2012

Wednesday 11 April 2012

- MicroRNA-9 regulates axon development in cortical neurons
Dr Federico Dajas-Bailador

Wednesday 18 April 2012

- Vision, adaptation and superstition
Matteo Carandini

Wednesday 25 April 2012

- Clocks and environment: adaptation is not so simple
Professor Diez-Noguera

Wednesday 02 May 2012

- The role of the extracellular matrix and matrix metalloproteinases in IL-1-induced neurotoxicity / Effects of light during postnatal development on the photic response of the circadian system
Fiona Britton / Elisabeth Brooks

Wednesday 09 May 2012

- Shocking flies: models for human epilepsy
Dr Richard Baines

Wednesday 16 May 2012

- TBA / TBA
Daniel Elijah / Sarah Otto

Wednesday 30 May 2012

- TBA / Programmed epigenetic changes in response to maternal undernutrition
Christopher Logie / Ghazala Begum

Wednesday 06 June 2012

- TBA / Sensitivity changes in diabetic neuropathy: a role for MAP Kinases?
Ali Al Shaghthrah / Victoria Newton

Wednesday 13 June 2012

- Understanding how injured tissue communicates with the immune system / TBA
Catherine Savage / Emily Robinson

Wednesday 20 June 2012

- TBA
David Bechtold

Wednesday 27 June 2012

- TBA / TBA
Harry Milton / Ling Zhuang

Wednesday 04 July 2012

- Neuroscience First Year PhD Presentation Day
Various

Wednesday 11 July 2012

- Melanopsin contributions to visual coding
Timothy Browns
