

Special Seminars

Dec 2010 - July 2011

Monday, 06 December 2010

Ageing and sleep: the biological clock and sleep disturbance
Various Speakers

Wednesday, 08 December 2010

Prospects for Stem Cell Therapy in the Retina
Dr Rachael Pearson, University College London, Institute of Ophthalmology

Monday, 24 January 2011

Towards implementing a systems biology approach to investigate the gut microbiota
Dr Julian R. Marchesi, School of Biosciences, University of Cardiff

Monday, 14 February 2011

Amoebiasis: diagnosis, epidemiology and immunity
Dr. Rashidul Haque, International Centre for Diarrhoeal Diseases Research, Bangladesh

Social Evolution in Microbes
Prof Kevin Foster, University of Oxford

Friday, 18 March 2011

What the tooth and palate tell us about morphogenesis and morphogens
Dr. Jeremy B.A. Green, Department of Craniofacial Development, Kings College London

Friday, 08 April 2011

Science blogging
Dr Ed Yong, Not Exactly Rocket Science

Monday, 11 April 2011

Control of Multidrug Resistance in Fungi
Scott Moye-Rowley, Department of Molecular Physiology and Biophysics, University of Iowa

Tuesday, 19 April 2011

The evolution of gene expression in Drosophila embryogenesis: uncovering the molecular basis of the morphological hourglass

Alex Kalinka, Max Planck Institute (Dresden)

Thursday, 21 April 2011

Microfluidics: Engineering Medicine at The Biological Scale

Prof Abraham P. Lee, University of California at Irvine, Department of Biomedical Engineering
