

Molecular Cancer Studies Seminars May-July 2011

Time and venue: Thursdays, Michael Smith seminar room
1:30-3

All welcome; contact: m.k.demonacos@manchester.ac.uk

- May 5th **Clare Davies** (Tournier Lab)
"The role of protein phosphorylation, ubiquitination and methylation in the control of AP-1 gene activity in tumorigenesis"
Deepankar Gahloth (Tabernero lab)
"Structural studies of His-domain containing protein tyrosine phosphatase"
- May 12th **Ioannis Bantounas** (Withmarsh lab)
"MicroRNA control of intracellular signaling"
Sonia Mazzitelli (Tournier lab)
"Requirement of active JNK for Abeta deposition"
- May 19th **Lenka Halova** (Petersen lab)
"Aurora regulates cell size in response to nutrient availability"
Stefan Loska (Tournier lab)
"Regulation of ULK1 in autophagy"
- June 16th **Tim Somervaille** (Paterson)
"Stem cells and leukaemia"
Host: Marija Krstic-Demonacos
- June 30th **Juan-Jose Ventura** (Cambridge)
"Regulation of lung alveolar stem cells by MAPKs"
Host: Cathy Tournier
- July 7th **Paul Hurd** (Queen Mary, University of London)
"ChIPing away at the epigenome"
Host: Alan Whitmarsh
