

Tissue Systems Seminar Series 2011

Michael Smith Lecture Theatre, Thursdays 12:00

Organised by Enrique Amaya and Charles Streuli

5th May **Carlo Knupp** – Cardiff University

Three-dimensional electron tomography throws new light on the structure of the cornea

12th May **James Briscoe** – NIMR

The gene regulatory logic for reading the sonic hedgehog gradient in the vertebrate neural tube

19th May **Robert Steadman** – Cardiff University

Controlling cell fate in fibrosis: the role of hyaluronan

26th May **Matthew Hardman** – University of Manchester

Exploiting estrogen signalling to promote wound healing

9th June **Seminar Cancelled**

16th June **Patrick Caswell** – University of Manchester

Endocytic trafficking of integrins regulates invasive migration of cancer cells

23rd June **Rachel Lennon** – University of Manchester

A new perspective on the glomerular matrix
